

DECOMPOSED RED GRANITE

A finely crushed red granite material that compacts well, making it ideal for pathways, garden trails, and decorative ground cover. Provides a natural reddish-brown appearance that blends beautifully into landscapes.

3/4 INCH RIVER ROCK

Smooth, naturally rounded stones in a variety of earth-tone colors. Great for landscaping, drainage areas, garden borders, and decorative ground cover.

6-12 INCH RIVER ROCK

Medium to large natural river stones ideal for decorative landscaping, water features, and erosion control. Adds texture and a natural appearance to any outdoor space.

BASE COURSE

A compactable aggregate designed to create a strong, stable foundation for driveways, patios, sidewalks, and other hardscape projects. Excellent for improving drainage and long-term durability.

18 INCH RIVER ROCK

Large decorative river rocks that create bold landscape features and natural focal points. Perfect for erosion control, dry creek beds, and accenting ponds or commercial landscapes.

1.5 INCH RIVER ROCK

Larger rounded river rock that provides excellent coverage and drainage while creating a clean, polished landscape look. Popular for flower beds, around trees, and drainage applications.

BRYAN RED

A decorative crushed stone featuring warm red and pink tones. Commonly used for flower beds, landscape accents, and around buildings to add vibrant color and curb appeal.

BLUE BASE

A crushed limestone and aggregate blend that compacts into a durable surface. Commonly used as a foundation material for driveways, parking areas, and paving projects.

LIMESTONE

A versatile crushed stone often used for driveways, pathways, parking areas, and construction projects. Compacts well while maintaining good drainage characteristics.

3/8 INCH RIVER ROCK

Small, smooth river rock with attractive natural colors. Ideal for decorative beds, walkways, around pavers, and areas where a finer finished appearance is desired.
